Subject: RM 10.9 - FYI - SharePoint links to Tierra's pipeline survey SOW

John,

To follow up on our conversation earlier this week and for your information, the SharePoint links to Tierra's SOW for RM 10.9 pipeline survey work and the associated HASP are provided below. Tierra is resubmitting the QAPP and that is expected to be posted on SharePoint tomorrow.

Tierra's tentative plan is to conduct the survey work the first week of June. However, this is dependent upon EPA's approval of the QAPP, the on-going work at 10.9, and their subcontractors schedule. I'll keep you informed of Tierra's tentative plans as that information comes in. I've also relayed to Tierra that the 10.9 work may extend into June if the bridge repairs have not yet been resolved.

<http://passaic.sharepointspace.com/members/TIERRA%20Planning/Planning%20Documents/HASP%20-%20RM%2010.9%20Pipeline%20Survey%20Parametric%20Echo%20and%20GPR%20April%202014.pdf>

I'm not certain if you've been granted access to Tierra's planning documents library so please let me know if you have any problems accessing the documents. I do believe Rob Law has the appropriate access.

Thanks,

Jennifer LaPoma
